Objectives

- **Understand the different phases in exercise design cycle**
- **Understand the four essential pillars in exercise design**

Exercise Design Model

Assessment

- **Review Plans**
- **Review past events and exercise response**
- **Identify gaps in skills and knowledge**
- **Organizational preparedness levels**

Devise expected outcomes, actions and metrics, and compose a narrative.

- **Compose narratives and establish metrics and outcomes for the participants.**
- **Working with internal and external subject matter experts and stakeholders will ensure that the scenario being presented in the narrative is realistic.**
- **Establish tasks, major and minor events, Master Scenario Event List, and create exercise structure.**
- **This phase also helps the exercise design lead to think about staffing options, such as simulators, controllers, evaluators to make up the exercise staffing**

Devise message options, structure management and prepare messages.

- The messages "support and compliment the exercise narrative and are crafted with the exercise objectives in mind
- This phase is meant to ensure communication processes between exercise staff and participants is smooth, and as with all other phases, properly documented.
